Clinical simulation in nursing education is essentially the life-like replication of situations that nurses would typically face as part of their professional careers. Typically, these simulations come equipped with all the technology and devices you would find in a hospital setting. There are even manikins that provide life-like responses to treatments. Advantages of Clinical Simulation in Nursing

Simulation in Nursing Education
Simulation in Nursing Education is used to teach learners concepts relating to the care of patients who are either sick or infirm. Through the replication of real-world nursing scenarios and experiences, learners can practice the skills necessary to succeed in the field, without ever putting a real-life patient at risk.
