Revolutionary essays on design, aesthetics and materialism - from one of the great masters of modern architecture Adolf Loos, the great Viennese pioneer of modern architecture, was a hater of the fake, the fussy and the lavishly decorated, and a lover of stripped down, clean simplicity. He was also a writer of effervescent, caustic wit, as shown in this selection of essays on all aspects of design and aesthetics, from cities to glassware, furniture to

footwear, architectural training to why 'the lack of ornament is a sign of intellectual power'.

Painting Wargaming Figures Kalmbach Publishing Company Whether it's sleek leather pants, a shiny new Apple computer, or a designer toaster, we make important decisions as consumers every day based on our sensory experience. Sensory appeals are everywhere, and they are intensifying,

radically changing how Americans live and work. The twenty-first century has become the age of aesthetics, and whether we realize it or not, this influence has taken over the marketplace, and much more. In this penetrating, keenly observed book, Virginia Postrel makes the argument that appearance counts, that aesthetic value is real. Drawing from fields as diverse as fashion, real

estate, politics, design, and economics, Postrel deftly chronicles our culture's aesthetic imperative and argues persuasively that it is a vital component of a healthy, forward-looking society. Intelligent, incisive, and thought-provoking, *The Substance of Style* is a groundbreaking portrait of the democratization of taste and a brilliant examination of the way we live now. Italian Ways: On and Off the Rails from Milan to Palermo Sterling

The rigging of period ship models is the most complex task which any modeller has to take on, for an eighteenth-century man-of-war boasted mile on mile of rigging, more than 1,000 blocks, and acres of canvas. To reduce this in scale, and yet retain an accurate representation, is an awesome undertaking. This now classic work untangles the complex web, and, using some 400 drawings, the author shows clearly how each separate item of rigging is fitted to the masts, yards and sails. Each drawing deals with only one particular item so that it can be seen clearly in isolation. The lead of a

particular halliard, the arrangement of a bracing line, these and every other detail is depicted with startling clarity. Based on the author's research of numerous eighteenth-century models, each one with its contemporary rigging still extant, the information is both meticulous and accurate. The remarkable visual immediacy and clarity of this work makes it truly unique and no modeller of period ships can afford to be without it at his side. In addition, the book is a must-have practical reference work for all those involved in the rigging and repair of historic ships.

Italy's residents are a migratory people. Since 1800 well over 27 million left home, but over half also returned home again. As cosmopolitans, exiles, and 'workers

of the world' they transformed their homeland and many of the countries where they worked or settled abroad. But did they form a diaspora? Migrants maintained firm ties to native villages, cities and families. Few felt much loyalty to a larger nation of Italians. Rather than form a 'nation unbound,' the transnational lives of Italy's migrants kept alive international regional cultures that challenged the hegemony of national states around the world. This ambitious and theoretically innovative overview examines the social, cultural and economic integration of Italian migrants. It explores their complex yet distinctive identity and their relationship with their homeland taking a comprehensive approach.

Javier Gomez, a highly talented

figure painter of long experience and excellent reputation, shares the secrets of his success in this accessible 'how-to' guide to painting miniatures. He takes the reader step-by-step through the whole process, from choice of materials (unlike other available guides it is not linked to any specific figure manufacturer) and preparation of the miniatures to basing and even advice on photographing the finished item. Techniques such as dry-brushing, ink-washing, shading and highlighting are all explained clearly with the help of step-by-step photographs and colour charts. Specific case studies tackle a variety of useful subjects across all periods, such as mixing realistic flesh tones

for different races; painting horses; guns and limbers; Medieval heraldry; Napoleonic uniforms; WW2 and modern camouflage patterns. Javier also clearly explains how these techniques and processes can be applied to all the major wargaming scales, from 40mm down to 6mm. Whatever historical period (or Sci-fi/Fantasy) and whatever scale the reader is interested in, this book is an invaluable source of practical advice and inspiration.

What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China 's fake goods industry, and celebrity

philanthropy in Africa have in common? With biopirates trolling the blood industry, fish-farming bandits ravaging the high seas, pornography developing virtually in Second Life, and games like World of Warcraft spawning online sweatshops, how are rogue industries transmuting into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark

economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era.
