This French novella narrates the experiences of a Senegalese girl who, after being rescued from slavery, is raised by a noble French family during the French Revolution. She remains unaware of her difference because of being raised in a privileged household until she overhears a conversation that makes her conscious of her race and of the discrimination it faces. After learning about her

roots, Ourika lives not as a French woman but as a black person. The story then presents the struggles she faces with her newly discovered identity as an educated African lady in eighteenth-century Europe. Claire de Duras wrote this best-seller twenty-five years before the abolition of the slave trade in France. This period was a time when not a lot of women published their work, so Duras published Ourika anonymously. It marks an important event in European literature as it is the first novel set in Europe to have a black female protagonist. Despite being a short story, this work addresses the

themes of race, nationality,  
interracial love.

Why did medieval dramatists weave so  
many scenes of torture into their plays?

Exploring the cultural connections among  
rhetoric, law, drama, literary creation, and  
violence, Jody Enders addresses an issue  
that has long troubled students of the  
Middle Ages. Theories of rhetoric and law  
of the time reveal, she points out, that the  
ideology of torture was a widely accepted  
means for exploiting such essential  
elements of the stage and stagecraft as  
dramatic verisimilitude, pity, fear, and  
catharsis to fabricate truth. Analyzing the  
consequences of torture for the history of

---

aesthetics in general and of drama in particular, Enders shows that if the violence embedded in the history of rhetoric is acknowledged, we are better able to understand not only the enduring "theater of cruelty" identified by theorists from Isidore of Seville to Antonin Artaud, but also the continuing modern devotion to the spectacle of pain.

The delightful first title in a new collaboration with Channel 4's Walter Presents: a fast-paced comic mystery enriched by a deep love of books In the small town of Crozon in Brittany, a library houses manuscripts that were rejected for

publication: the faded dreams of aspiring writers. Visiting while on holiday, young editor Delphine Despero is thrilled to discover a novel so powerful that she feels compelled to bring it back to Paris to publish it. The book is a sensation, prompting fevered interest in the identity of its author - apparently one Henri Pick, a now-deceased pizza chef from Crozon. Sceptics cry that the whole thing is a hoax: how could this man have written such a masterpiece? An obstinate journalist, Jean-Michel Rouche, heads to Brittany to investigate. By turns farcical and moving, The Mystery of Henri Pick

is a fast-paced comic mystery enriched by a deep love of books - and of the authors who write them. *Le Mystère Des Cathédrales* University Press of Kentucky "The evil that men do" has been chronicled for thousands of years on the European stage, and perhaps nowhere else is human fear of our own evil more detailed than in its personifications in theater. In *Stages of Evil*, Robert Lima explores the sociohistorical implications of Christian and pagan representations of evil and the theatrical creativity that occultism has engendered. By examining examples of alchemy, astronomy,

demonology, exorcism, fairies, vampires, witchcraft, hauntings, and voodoo in prominent plays, *Stages of Evil* explores American and European perceptions of occultism from medieval times to the modern age.

Throughout human history luxury textiles have been used as a marker of

importance, power and distinction. Yet, as the essays in this collection make clear, the term ' luxury ' is one that can be fraught with difficulties for historians. Focusing upon the consumption, commercialisation and production of luxury textiles in Italy and the Low Countries during the late medieval and early modern period, this volume offers a fascinating exploration of the varied and subtle ways that luxury could be interpreted and understood in the past. Beginning with the consumption of luxury textiles, it takes the reader on a journey back from the market place, to the commercialisation of rich fabrics by an international network of traders, before arriving at the workshop to explore the

---

Italian and Burgundian world of production of damasks, silks and tapestries. The first part of the volume deals with the consumption of luxury textiles, through an investigation of courtly purchases, as well as urban and clerical markets, before the chapters in part two move on to explore the commercialisation of luxury textiles by merchants who facilitated their trade from the cities of Lucca, Florence and Venice. The third part then focusses upon manufacture, encouraging consideration of the concept of luxury during this period through the Italian silk industry and the production of high-quality woollens in the Low Countries. Graeme Small draws the various themes of the volume together in a

conclusion that suggests profitable future avenues of research into this important subject.

Cyclic Form and the English Mystery Plays is centred upon the five extant English mystery cycles with a view to examining the cyclic form they share. It is based upon consideration of the differences between the texts and upon the underlying assumptions governing this dramatic form. The cycles are extensively compared with practices in the cyclic dramas of France, the German-speaking areas, Italy, the Netherlands, and Spain in the late middle ages and the early

---

modern period. There is also a unique and innovative bridging with iconographical material from a range of artistic modes giving further insight into the structure and organisation of cyclic form. Cyclic Form and the English Mystery Plays should be of interest to undergraduate students and to more experienced researchers in the early drama and the study of visual images and artefacts.

This book is the first full-length study of the art and writings of Jean Delville. As a member of the

younger generation that emerged during the end of the nineteenth century, he was a dynamic leader of a group of avant-garde artists who sought to establish a new school of Idealist Art in Belgium. He was one of the most talented painters of his generation, producing a vast body of works that, in both scale and technical accomplishment, is unsurpassed amongst his contemporaries. In his extensive writings in contemporary journals and books, he pursued a singular vision for the purpose of art to serve as a vehicle for social change, as well as to inspire individuals to be drawn to a higher, spiritual

---

reality. Delvilles thinking is heavily indebted to the hermetic and esoteric philosophy that was widely popular at the time, and his paintings, poetry and writings reformulate the main tenets of this tradition in a contemporary context. In this regard, his aesthetic and artistic goals are similar, if not identical, to those found in the writings and art of Kandinsky and Mondrian during the early twentieth century.
