This issue provides background for understanding the skills gap and an action plan for taking charge of it. ASTD defines a skills gap as a significant gap between an organization's current capabilities and the skills it needs to achieve its goals. The key to achieving success under such circumstances is to harness skilled talent to meet goals, a task that has become more and more challenging in an increasingly global, virtual, and changing world. The 10th edition of School to Career builds on what made the previous editions so successful. Students explore careers using

the career clusters and pathways framework; understand workplace expectations; develop career-readiness skills; and plan for life beyond graduation. School to Career provides students with the “ how to ” needed for preparing a r é s u m é , searching for a job, taking on a work-based learning experience, exceeding employer expectations, managing personal finances, and funding postsecondary training and education. Case studies are used to examine challenges students may encounter in the world of work. • Communication, math, and technology skills are developed through activities and useful examples. • Each chapter provides insights on ethics and

on using natural resources wisely. • Self-assessment opportunities help focus attention on the acquisition of key concepts.

Introduction to Kinesiology
Bloomsbury Publishing
Canada's public higher education system is in trouble. The economic and social benefits of the Canadian university system are widely seen as a public good, which raises a pressing question: Why should we aspire to anything less than a great system? For that to happen, everything about the way universities currently operate, from the boardroom to the classroom, must change – but this kind of operational and public policy transformation will not be easy. *Nothing Less than Great* provides an expert analysis of the current state and challenges of Canada's university system, looking for positive change by reclaiming what a university is meant to offer for society and for citizens. Harvey P. Weingarten begins with the fundamental question that all students must ask about higher education: Is it worth going to university? From there, he stresses the need for transparency about what universities do and what

they accomplish, addresses the importance of modernizing curriculum to emphasize skills over content, and provides recommendations for reform. Exploring how universities might – and should – change to reclaim their central purpose for Canadians, *Nothing Less than Great* will be of interest to anyone who cares about the future of our country and the important role universities play in determining that future.

Social Workers in Australia are increasingly called upon to work across social differences in ways that promote social justice and challenge growing inequity, and anti-oppressive practice has been put at the heart of qualifying programmes. In this exciting new collection, some of Australia's leading social work academics explore working across so-called human differences within the context of

contemporary social work. By drawing on the insights and theories of people who have been positioned as 'different', the authors use practice vignettes and original data to provide ways to join theory and practice, with a primary focus on thinking about how to change patterns of social difference. Whether a social work student or an experienced practitioner, *Working Across Differences* is essential reading for anyone who values anti-oppressive practice and social justice.
