The Teacher Book This booklet contains answers and transcripts for all exercises. The Spanish Listening Booklet matches to the minutest details the content of the 19 units included in the best-selling workbook for beginner-to-pre-intermediate learners "Spanish sentence builders", by the same authors. For best results, the two books should be used together. This book fully implements Dr Conti's popular approach to listening-skills instruction, L.A.M. (aka Listening-As-Modelling), laid out in his seminal work: "Breaking the Sound Barrier: Teaching Learners how to Listen" (Conti and Smith, 2019). L.A.M. is based on the concept that listening instruction should train students in the mastery of the key micro-listening skills identified by cognitive psychologists. Each unit contains around 13 listening tasks, which provide continuous and extensive recycling of the target constructions and vocabulary items and address the development of the key listening micro-skills. The tasks include engaging and tested Conti classics such as: "Spot the intruder",

"Missing details", "Faulty transcript", "Break the flow", "Faulty translation", "Gapped translation" and "Listening slalom", alongside more traditional listening comprehension tasks. Collins International Primary Maths – Problem Solving and Reasoning Student Book 3 Heinemann Secondary This book demonstrates the positive impact of using film and audiovisual material in the language classroom. The chapters are evidence-based and address different levels and contexts of learning around the world. They demonstrate the benefits of using moving images and films to develop intercultural awareness and promote multilingualism, and suggest Audiovisual Translation (AVT) activities and projects to enhance language learning. The book will be a valuable continuing professional development resource for language teachers and those involved in curriculum development, as well as bringing the latest research, theory and pedagogical techniques to teacher training courses.
