Bled Hachette Education

From antiquity to the present day Philo of Alexandria has been famous for his allegorical treatises on Genesis. This is the first translation and commentary on an allegorical work in the Philo of Alexandria Commentary Series.

Bread, Politics and Political Economy in the Reign of Louis XV BRILL

A new edition of Kaplan's landmark study on eighteenth-century French political economy, reissued with a new Foreword by Sophus A. Reinert. Based on research in all the Parisian depots and more than fifty departmental archives and specialized and municipal libraries, Kaplan's classic work constitutes a major contribution to the study of the subsistence problem before the French Revolution and the political economy of

deregulatory reform. Anthem Press is proud to reissue this path breaking work together with a significant new historiographic companion volume by the author, "The Stakes of Regulation: Perspectives on 'Bread, Politics and Political Economy' Forty Years Later."

Philo of Alexandria: On Cultivation Anthem Press

The eighteenth century has often been viewed as a period of relative decline in the field of microscopy, as interest in microscopes seemed to wane after an intense period of discovery in the seventeenth century. As such, developments in the field during the Enlightenment have been largely overlooked. This book therefore fills a considerable gap in the study of this life science, providing a thorough analysis of what the main concerns of the field were and how microscopists learned to communicate with each other in relevant ways in order to compare results and build a new discipline. Employing a substantial body of contemporary literature from across Europe, Marc J. Ratcliff is able to present us with a definitive account of the state of research into microscopy of the period. He brings to light the little known work of Louis Joblot, re-evaluates the achievements of Abraham Trembley and gives new weight to Otto-Friedrich Müller's important contributions. The book also connects changes in instrument design to an innovative account of microscopical research during the eighteenth century and the rich social networks of communication that grew during this period. Investigating the history of microscopical research from 1680 up to 1800 also shows how scholars progressively established a modern rule on which to shape their new discipline: balancing microscopical magnification with shared vision. This rule developed in response to the diminishing size of the microscopical object during the course of the eighteenth century, from dry minute organisms such as insects, to aquatic minute bodies such as polyps, and finally to aquatic invisible

organisms, thus completing the scholar's quest to study the invisible. This book will be essential reading for historians of microscopy, epistemologists, and for historians of the life sciences in the modern period.

Histoire Philosophique Du Monde Primitif Routledge
This is a reproduction of the original artefact. Generally these books are created from careful scans of the original. This allows us to preserve the book accurately and present it in the way the author intended. Since the original versions are generally quite old, there may occasionally be certain imperfections within these reproductions. We're happy to make these classics available again for future generations to enjoy!

The Friend of Peace; by Philo Pacificus [pseud.

Oxford University Press

The publishing industry in France in the years before the Revolution was a lively and sometimes rough-and-tumble affair, as publishers and printers scrambled to deal with (and if possible evade) shifting censorship laws and tax regulations, in order to cater to a reading public's appetite for books of all kinds, from the famous *Encyclopédie*, repository of reason and knowledge, to scandal-mongering libel and pornography. Historian and librarian Robert Darnton uses his exclusive access to a trove of documents-letters and documents from authors, publishers, printers, paper millers, type foundries, ink manufacturers, smugglers, wagon drivers, warehousemen, and accountants-involving a publishing house in the Swiss town of Neuchâtel to bring this world to life. Like other places on the periphery of France, Switzerland was a hotbed of piracy, carefully monitoring the demand for certain kinds of books and finding ways of fulfilling it. Focusing in particular on the diary of Jean-François Favarger, a traveling sales rep for a Swiss firm whose 1778 voyage, on horseback and on foot,

around France to visit bookstores and renew accounts forms the spine of this story, Darnton reveals not only how the industry worked and which titles were in greatest demand, but the human scale of its operations. A Literary Tour de France is literally that. Darnton captures the hustle, picaresque comedy, and occasional risk of Favarger's travels in the service of books, and in the process offers an engaging, immersive, and unforgettable narrative of book culture at a critical moment in France's history.

Ecclesiastical researches; or, Philo and Josephus proved to be historians and apologists of Christ. [With] Sequel
This is a rich and path-breaking comparative study of reading tastes in the final years of old regime Europe. Based on extensive research in the account books of the Swiss publishers, the Soci  t   Typographique de Neuch  tel (STN), and related archives, it charts the dissemination of literature and reading tastes across Europe in the years leading up to the French revolution. In the process, it recasts our understanding of late 18th-century print culture and the contours of the enlightenment. The fruit of a widely acclaimed five year database project, the STN database, it is also a story of pioneering efforts to apply the latest digital technology and GIS mapping techniques to traditional historical and bibliographic problems. Although written to serve as a standalone study, this book is ideally complemented by its companion volume, Mark Curran's *The French Book Trade in Enlightenment Europe I: Selling Enlightenment*, which offers a radical reinterpretation of the structure and practices of the European book trade. The STN database is now recognised as a cutting-edge digital project of global significance. Robert Darnton has called it "a prodigious accomplishment and a joy to use" while Jeremy Popkin adds, "No one working in the field of French Enlightenment studies ... can afford to ignore the rich mine of data that Simon Burrows and his collaborators have made accessible, in an eminently usable form, and the new possibilities it opens up for scholars." *The French Book Trade in Enlightenment Europe I and II* offer a roadmap of that data and what it can show us.
