The main purpose of the eleven contributions to this volume is to reconsider and re-assess the role of cores and peripheries in shaping modern socio-technical systems. From this perspective they explore a terrain of highly complex systems mainly operating on the so-called Western model: Railways, telegraphs, motor vehicles and airports were, in fact, all born in classic cores areas in the West and then spread out into the peripheries. The approach in itself is not new, but this volume has managed to bring out interestingly innovative elements and viewpoints. The contributors are not content with the traditional definitions of peripheries and flows, but tend to put them to the test, revise them and eventually offer critiques. The result is a tempering of the monolithic and traditional concept of a one-way transfer. No longer, therefore, a simple and linear act of adoption, but a recourse to adaptation – changes in meaning, use and perception. The volume is a starting point for future explorations on the subject of science and technology studies and takes part in a wider discussion of globalisation, global and transnational history.

Florence: Capital of the Kingdom of Italy, 1865-71 Taylor & Francis
During the first two-thirds of the 20th century the themes of sectorial

structure and compared performance prevail in Italian economic historiography. In contrast, in the last part of the century attention is focused on the behavior of single economic actors and their micro-economic strategies. This book intends to act as a bridge between the two approaches, and reconstructs the secular journey of Italian industrial enterprise through an original study.

Nelson Fausto The Greek myth of Prometheus with its picture of a vulture feasting on its chained victim has traditionally provided a visual image of liver regeneration. It is a powerful and frightening representation but if one were to substitute the vulture by a surgeon and Prometheus by a patient laying on a properly prepared operating table, the outcome of the procedure would not differ significantly from that described by Greek poets. Yet few of us who work in the field have stopped long enough to ask where this myth originated. Did the poet observe a case of liver regeneration in a human being? Was it brilliant intuition or perhaps, literally, just a 'gut feeling' of a poet looking for good rhymes that led to the prediction that livers grow when part of the tissue is removed? This book does not attempt to solve these historical issues. It does, instead, cover in detail some of the major modern themes of research on liver regeneration, injury and repair. As indicated in Dr. N. Bucher's chapter, the modern phase of experimental studies on liver regeneration started in 1931 with the publication by Higgins and Anderson of a method to perform a two-thirds resection of the liver of a rat. The technique described has 3 remarkable features: 1) it is highly reproducible, resulting in the removal of 68% of the liver, 2) it has minimal if any mortality, and 3) it consists only of blood vessel ligation and does not involve cutting through or wounding hepatic tissue.

The Impact of Subsidized Housing on Property Values
Franco Angeli

Expanding Nationalisms at World 's Fairs: Identity, Diversity, and Exchange, 1851 – 1915 introduces the subject of international exhibitions to art and design historians and a wider audience as a resource for understanding the broad and varied political meanings of design during a period of rapid industrialization, developing nationalism, imperialism, expanding trade and the emergence of a consumer society. Its chapters, written by both established and emerging scholars, are global in scope, and demonstrate specific networks of communication and exchange among designers, manufacturers, markets and nations on the modern world stage from the second half of the nineteenth century into the beginning of the twentieth. Within the overarching theme of nationalism and internationalism as revealed at world 's fairs, the book 's essays will engage a more complex understanding of ideas of competition and community in an age of emergent industrial capitalism, and will investigate the nuances, contradictions and marginalized voices that lie beneath the surface of unity, progress, and global expansion.

This edited collection provides the first comprehensive history of Florence as the mid-19th century capital of the fledgling Italian nation. Covering various aspects of politics, economics, culture and society, this book examines the impact that the short-lived experience of becoming the political and administrative centre of the Kingdom of Italy had on the Tuscan city, both immediately and in the years that followed. It reflects upon the urbanising changes that affected the appearance of the city and the introduction of various economic and cultural innovations. The volume also analyses the crisis caused by the eventual relocation of the capital to Rome and

the subsequent bankruptcy of the communality which hampered Florence on the long road to modernity. Florence: Capital of the Kingdom of Italy, 1865-71 is a fascinating study for all students and scholars of modern Italian history.

Thomas Piketty's Capital in the Twenty-First Century initiated a great debate not just about inequality but also regarding the failures found in the economic models used by theoreticians and practitioners alike. Wealth of Persons offers a totally different perspective that challenges the very terms of the debate. The Great Recession reveals a great existential rift at the core of certain economic reflections, thereby showing the real crisis of the crisis of economics. In the human sciences we have created a kind of "Tower of Babel" where we cannot understand each other any longer. The "breakdowns" occur equally on the personal, social, political, and economic levels. There is a need for an "about-face" in method to restore harmony among dissociated disciplines. Wealth of Persons offers a key to such a restoration, applying insights and analysis taken from different economic scholars, schools of thought, philosophical traditions, various disciplines, and

charismatic entrepreneurs. *Wealth of Persons* aims at recapturing an adequate understanding of the acting human person in the economic drama, one that measures up to the reality. The investigation is a passport allowing entry into the land of economic knowledge, properly unfolding the anthropological meaning of the free economy.

This contributed volume is a collection of international writings on dance, human rights, and social justice in the 20th and 21st centuries. The book illuminates and analyzes dance in contexts of oppression and its subversion, as well as in situations promoting access to dance, and those encouraging healing from human rights abuses through movement.

La Città Altra. Storia E Immagine Della Diversità Urbana: Luoghi E Paesaggi Dei Privilegi E Del Benessere, Dell'isolamento, Del Disagio, Della Multiculturalità. Ediz. Italiana E Inglese University of Toronto Press

This volume takes a fresh and innovative approach to the history of ideas of work, concerning perceptions, attitudes, cultures and representations of work throughout Antiquity and the medieval and early modern periods. Focusing on developments in Europe, the contributors approach the subject from a variety of angles, considering aspects of work as described in literature, visual culture, and as perceived in

economic theory. As well as external views of workers the volume also looks at the meaning of work for the self-perception of various social groups, including labourers, artisans, merchants, and noblemen, and the effects of this on their self-esteem and social identity. Taking a broad chronological approach to the subject provides readers with a cutting-edge overview of research into the varying attitudes to work and its place in pre-industrial society.

Ci sono voluti secoli di sacrifici, sofferenze ed esercizio continuo della coercizione per fissare il lavoratore al posto di lavoro, poi per mantenercelo associandogli una vasta gamma di protezioni che definiscono uno statuto costitutivo dell'identità sociale. Ma è proprio nel momento in cui la "civiltà del lavoro", nata da questo processo secolare, sembrava ormai consolidata sotto l'egemonia del lavoro salariato e con la garanzia dello Stato sociale, che l'edificio si è crepato, facendo risorgere la vecchia ossessione popolare di dover vivere "giorno per giorno". Ormai il futuro ha impresso il sigillo dell'aleatorio. La questione sociale si pone, oggi, a partire dal centro della produzione e distribuzione della ricchezza, nell'impresa, attraverso il regno indiscusso del mercato; non è dunque, come si crede comunemente, quella dell'esclusione. Si traduce

nell'erosione delle protezioni e nella vulnerabilità degli status. L'onda d'urto prodotta dallo sgretolamento della società salariale attraversa l'intera struttura sociale e la scuote da parte a parte. Quali risorse si possono mobilitare per far fronte a questa emorragia e salvare i naufraghi della società salariale?

This book revolves around the idea that capitalism is not a democratic system and that a system of producer cooperatives, or democratically managed enterprises, gives rise to a new mode of production which is authentically socialist in essence and fully consistent with the ultimate rationale underlying Marx's theoretical approach. The author argues that the cooperative firm system outlined in this book

offers a rich array of non-economic benefits that justify its classification as a 'genuinely socialist' entity, with real potential for achieving true economic democracy.

Recent migratory flows to Europe have brought about considerable changes in many countries. Italy in particular offers a unique point of view, since it is possible to observe not only the way migration has changed specific features of the country, but also how it is intertwined with gender relations. Considering both the type of migration that has affected Italy and the consequent measures adopted by the Government, a variety of distinctive elements may be seen. By providing a broad and more complete picture of the Italian perspective on gender and migration, this book makes a valuable contribution to the wider debate. The contributions consider the problematic linkage between gender and migration, as well as analyse particular aspects including Italian colonial past, domestic work, self-determination, access to social services, second-generation migrant women, family law, multiculturalism and religious symbols. Taking an empirical and theoretical approach, the volume underlines both the multifaceted problems affecting migrant women in Italy and the way in which questions raised in other countries are introduced and redefined by Italian scholarship. The book presents a valuable resource for researchers, academics and policy-makers working in the areas of migration and gender studies.

French Twentieth Bibliography Editoriale Jaca Book

This volume proposes a rich corpus of papers about the 'Other City', a subject only few times dealt with, but worthy of all our attention: it imposes itself on the scene of international modern and contemporary historiography for its undeniable topicality. Throughout history, the city has always had to deal with social 'otherness', i.e. with class privileges and, consequently, with discrimination and marginalization of minorities, of the less well-off, of foreigners, in short, with the differences in status, culture, religion. So that the urban fabric has ended up structuring itself also in function of those inequalities, as well as of the strategic places for the exercise of power, of the political, military or social control, of the spaces for imprisonment, for the sanitary isolation or for the 'temporary' remedy to the catastrophes. From the first portraits of cities, made and diffused at the beginning of the fifteenth century for political exaltation purposes or for religious propaganda and for devotional purposes, which often, through increasingly refined graphic techniques, distort or even deny the true urban image, we reach, at the dawn of contemporary history, the new meaning given by scientific topography and new methods of representation; these latter aimed at revealing the structure and the urban landscape in their objectivity, often unexpected for who had known the city through the filter of 'regime' iconography. The representation of the urban image still shows the contradictions of a community that sometimes includes and even exalts the diversities, other times rejects them, showing the unease of a difficult integration.

The Resurgence of Class Conflict in Western Europe since 1968 Mimesis

This 1978 study examines the new working class of

scientists, white collar professionals, and technicians that has emerged in advanced in industrial societies and considers its role in the political process. Professor Low-Beer examines the lives of a sample group of Italian electronics technicians, as theirs had been the most militant profession in Italy. Although Low-Beer warns against quick conclusions regarding the broader political significance of such desires, vivid quotations from interviews illustrate the principal longing indicated by his statistical analyses: for more control over work situation. Whilst describing the lifestyles and class imagery among the technicians, the author compares them to other groups, and concludes that strike participation is to be explained by the political backgrounds of workers, and only secondarily by organizational factors. Professor Low-Beer also analyses the significance of the increase that had occurred in the number of professionals in technical professions for the future of politics and industrial conflict.
