This pioneering book offers the first account of the work of the photographers, both official and freelance, who contributed to the forging of Mussolini's image. It departs from the practice of using photographs purely for illustration and places them instead at the centre of the analysis. Throughout the 1930s photographs of the Italian dictator Benito Mussolini were chosen with much care by the regime. They were deployed to highlight those physical traits - the piercing eyes, protruding jaw, shaved head - that were meant to evoke the Duce's strength, determination and innate sense of leadership in the mind of his contemporaries. The chapters in this volume explore the photographic image in the socio-political context of the time and shows how it was a significant contributor to the development of Italian mass culture between the two world wars.

This monograph begins with a puzzle: a Babylonian text from late 5th century BCE Uruk associating various diseases with bodily organs, which has evaded interpretation. The correct answer may reside in Babylonian astrology, since the development of the zodiac in the late 5th century BCE offered innovative approaches to the healing arts. The zodiac—a means of predicting the movements of heavenly bodies—transformed older divination (such as hemerologies listing lucky and unlucky days) and introduced more favorable magical techniques and medical prescriptions, which are comparable to those found in Ptolemy's *Tetrabiblos* and non-Hippocratic Greek medicine. Babylonian melothesia (i.e., the science of charting how zodiacal signs affect the human body) offers the most likely solution explaining the Uruk tablet.
