The Way of The Linguist, A language learning odyssey. It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across frontiers and language barriers like never before. The Internet brings different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few

languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia. Why do not more people do the same? In his book *The Way of The Linguist, A language learning odyssey*, Steve offers some answers. Steve feels anyone can learn a language if they want to. He points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.

This book examines semiotics, meaning-making and the co-construction of relations in transmodal communications. Through the lens of transpositioning – the multiple and interwoven layers of emplacements and positionings that are entailed in communications which cross and transcend the boundaries that have historically shaped our thinking about the world and its inhabitants – the chapters interrogate digital languaging and literacies, and how transmodal communications shape identities, belongings and relationships, with particular attention paid to issues of equity and social justice. The chapter authors consider both transmodalities and critical cosmopolitanism as they analyze empirical data from youth, adults and researchers participating in a project that digitally connects youth to share their lives across diverse and under-resourced global communities. In offering this multi-perspectival, multi-voiced volume, the authors portray and address methodological issues in researching transglobal transmodal communications.
