Winner of the 2012 International Association for Relationship Research Book Award Can we predict how well -- or how poorly -- two strangers will get along? According to social psychologist William Ickes, the answer is yes. Drawing upon relevant research findings from his 30-year career, Ickes explains how initial interactions are shaped by gender, race, birth order, physical attractiveness, androgyny, the Big Five dimensions, shyness, and self-monitoring. Ickes's work offers unprecedented insights on the links between personality and social behavior that have not previously been compiled in a single source: how sibling relationships during childhood affect our interactions with opposite-sex strangers years later; why Latinos have a social advantage in initial interactions; how men react to the physical attractiveness of a female stranger in a relatively direct and obvious way while women react to the attractiveness of a male stranger in a more indirect and subtle way; and how personality similarity is related to satisfaction in married couples.

It emerged from work in five community college systems thanks to two National Science Foundation grants the Council for Undergraduate Research received to support community colleges' efforts to establish undergraduate research programs. Chapters one, two, and three provide background information about community colleges, undergraduate research, and the systems the author worked with: California, City University of New York, Maricopa Community College District - Arizona, Oklahoma, and Tennessee. Chapter four examines success strategies. The next five chapters look at five approaches to undergraduate research: basic/applied, course-based, community-based, interdisciplinary, and partnership research. Chapters ten, eleven and twelve discuss ways to assess and evaluate undergraduate research experiences, inclusive pedagogy, and ways to advance undergraduate research. Today there are 942 public community colleges in the United States, providing affordable access to 6.8 million students who enrolled for credit in one of the public two-year institutions in the United States. Students are more prepared for the next step in their education or careers after participating in quality UR experiences.
