Portraits in the Wild  
Bradt Travel Guides  
A hilarious, highly original collection of essays based on the Botswana truism: "only food runs!"  
With a new introduction and new

material from the author In the tradition of Bill Bryson, a new writer brings us the lively adventures and biting wit of an African safari guide. Peter Allison gives us the guide's-eye view of living in the bush, confronting the world's fiercest terrain of wild animals and, most challenging of all, managing herds of gaping tourists. Passionate for the

---

animals of the Kalahari, Allison works as a top guide in the wildlife-rich Okavango Delta. As he serves the whims of his wealthy clients, he often has to stop the impulse to run as far away from them as he can, as these tourists are sometimes more dangerous than a pride of lions. No one could make up these outrageous-but-true tales: the young woman who rejected the recommended safari-friendly khaki to wear a more "fashionable" hot pink ensemble; the lost tourist who happened to be drunk, half-naked, and a member of the British royal family; establishing a real friendship with the continent's most vicious animal; the Japanese tourist who requested a repeat performance of Allison's being charged by a lion so he could videotape it; and spending a crazy night in the wild after blowing a tire on a tour bus, revealing that Allison has as much good-natured scorn for himself. The author's humor is exceeded only by his love and respect for the animals, and his goal is to limit any negative exposure to humans by planning trips that are minimally invasive—unfortunately it

doesn't always work out that way! New story: People often ask safari guides about the experience that frightened them the most. In this story Peter Allison tells of the time he became aware of unseen danger, and knew that somewhere within meters of him was a hunting lioness. Peter Allison is originally from Sydney, Australia. His safaris have been

featured in National Geographic, Conde Nast Traveler, and on television programs such as Jack Hanna's Animal Adventures. He travels frequently to speaking appearances, and splits most of his time between Botswana, Sydney, and San Francisco. Wild Land Springer African Wildlife Alphabet and Number Book will delight young children with its array of exciting and unusual creatures from Africa. A first ABC and counting book for preschoolers, it also features lively pages at the back of the book that

introduce the Big 5 and typical African scenes of bushveld, river and seashore. A night-time scene introduces an array of creatures that come out after dark.

“ Marsh Girl ” have haunted Barkley Cove, a quiet town on the North Carolina coast. So in late 1969, when handsome Chase Andrews is found dead, the locals immediately suspect Kya Clark, the so-called Marsh Girl. But Kya is not what they say. Sensitive and intelligent, she has survived for years alone in the marsh that she calls home, finding friends in the gulls and lessons in the sand. Then the time comes when she yearns to be touched and loved. When two young men from

town become intrigued by her wild beauty, Kya opens herself to a new life—until the unthinkable happens. *Where the Crawdads Sing* is at once an exquisite ode to the natural world, a heartbreaking coming-of-age story, and a surprising tale of possible murder. Delia Owens reminds us that we are forever shaped by the children we once were, and that we are all subject to the beautiful and violent secrets that nature keeps. **Select Notes Bradt Travel Guides**

There may be no challenge greater; Africa's fauna are vast in number and rich in diversity. In this finely crafted collection, French photographer Laurent Baheux uses the medium of black-and-white photography to capture the intricate details of both the wondrous beasts and the magnificent settings in which they dwell. This wide-ranging volume lays particular emphasis on his subjects' individual spirits--revealing all of their vulnerability while losing nothing of their raw vitality.

Every photograph is so carefully composed and well lit that the details equal the evocative precision of an Old Masters portrait. Through Baheux's eyes we get close to the creatures that will both inspire and humble us all. Watching Wildlife Southern Africa HarperCollins UK This book traces the emergence of wildlife policy in colonial eastern and central Africa over the course of a century. Spanning from imperial conquest through the consolidation of colonial rule, the rise of nationalism, and the emergence of

---

neocolonial and neoliberal institutions, this book shows how these fundamental themes of the twentieth century shaped the relationships between humans and animals in what are today Kenya, Tanzania, Uganda, Zambia, and Malawi. A set of key themes emerges—changing administrative forms, militarization, nationalism, science, and a relentlessly broadening constituency for wildlife. Jeff Schauer illuminates how each of these developments were contingent upon the colonial experience, and how they fashioned a web of

structures for understanding and governing wildlife in Africa—one which has lasted into the twenty-first century.

Peloubet's Select Notes on the International Bible Lessons for Christian Living Crown From space, Africa is a shattered land, textured by burning sands, seas of grass and steaming forests. It is scarred by mountains and bejewelled by great lakes and rivers. This ancient continent is also alive with some of

the greatest wildlife on Earth. The book covers the fragmented areas of Africa: the jungle, the mountains, the savannah, the rivers and lakes, the coasts, and the deserts. It shows how a once stable continent has been fragmented and how this process has catalyzed the evolution of some remarkable animals and plants. In the savannah, carnivorous ants consume as much meat

---

as lions, while in the jungle, where light barely penetrates the leaf canopy, there are diminutive forms of familiar animals - pygmy chimpanzees, forest elephants and dwarf hippos.

When South African conservationist Lawrence Anthony was asked to accept a herd of "rogue" wild elephants on his Thula

Thula game reserve in Zululand, his common sense told him to refuse. But he was the herd's last chance of survival: they would be killed if he wouldn't take them. In order to save their lives, Anthony took them in. In the years that followed he became a part of their family. And as he battled to create a bond with the elephants, he came to realize that they had a great deal to teach him about life,

loyalty, and freedom. The Elephant Whisperer is a heartwarming, exciting, funny, and sometimes sad account of Anthony's experiences with these huge yet sympathetic creatures. Set against the background of life on an African game reserve, with unforgettable characters and exotic wildlife, it is a delightful book that will appeal to animal lovers and adventurous souls

A worldwide surge in poaching and wildlife trafficking is threatening to decimate endangered species. This crisis also threatens the security of human beings in ways ignored until recently by decision-makers slow to begin to treat what is typically viewed as a 'conservation issue' as serious crime. Over the past decade, as the scale and profitability of poaching and wildlife trafficking have

grown, politicians, journalists and campaigners throughout the world have begun to take notice – they are offering striking appraisals of the threat posed not only to endangered species but also to human populations. Many of these appraisals, however, are made in the absence of a detailed body of empirical research and analysis to underpin them. The result is the growth of a range of myths and misperceptions around the security threats posed, particularly as they relate to Africa. Poaching, Wildlife Trafficking and Security in

Africa examines the most common narratives on poaching, wildlife trafficking and security. It critically analyses the dominant discourses on poaching and wildlife trafficking as threats to human security, as drivers of conflict, as funders of terrorism and as a focus for organised crime. In doing so, it seeks to sort myth from reality, to clarify how poaching and wildlife trafficking, as much cited threats to security, can most accurately be conceived. Such a study is crucial to the efforts of stakeholders now rightly looking to respond not just

---

to the threat posed to endangered species, but also to the security and wellbeing of human beings. Wildlife Conservation in Africa Struik Pub Ready for a safari? When Kobie Krüger, her game-ranger husband and their three young daughters moved to one of the most

---

isolated corners of the world - a remote ranger station in the Mahlangeni region of South Africa's vast Kruger National Park - she might have worried that she would become engulfed with loneliness and boredom. Yet, for Kobie and her family, the seventeen years spent in this spectacularly beautiful park proved to be the most magical - and occasionally the most hair-raising - of their lives. Kobie recounts their enchanting adventures and extraordinary experiences in this vast reserve - a place where, bathed in golden sunlight, hippos basked in the glittering waters of the Letaba River, storks and herons perched along the shoreline, and fruit bats hung in the sausage trees. But as the Krugers settled in, they discovered that not all was peace and harmony. They soon became accustomed to living with the unexpected: the sneaky hyenas who stole blankets and cooking pots, the sinister-looking pythons that slithered into the house, and the usually placid elephants who grew foul-tempered in the violent heat of the summer. And one terrible day, a lion attacked Kobus in the bush and nearly killed him. Yet nothing

---

prepared the Krugers for their greatest adventure of all, the raising of an orphaned prince, a lion cub who, when they found him, was only a few days old and on the verge of death. Reared on a cocktail of love and bottles of fat-enriched milk, Leo soon became an affectionate, rambunctious and adored member of the family. It is the rearing of this young king, and the hilarious

endeavours to teach him to become a 'real' lion who could survive with his own kind in the wild, that lie at the heart of this endearing memoir.

It is a memoir of a magical place and time that can never be recaptured.
