Good points: case studies linked to UK practice, I like the combination approach, the study skills advice, the targetting of learning theory to learning A&P, including adrenaline with epinephrine in brackets, interspersing calculations as exercises, good test activities, good reading for intro to A&P (ch. 2), good references (eg ch3), good reference to child/infant for burn extimation, good clinical application (eg assessing peripheral perfusion activity -pinching nail), good to see photographs." Penny Goacher, School of Nursing and Midwifery, University of East Anglia "This fabulous book presents anatomy and physiology in a visually stimulating way, taking readers on a journey through what many view as a complex maze of systems.
