North Carolina State Park Map Guide UNC Press Books

North Carolina harbors an incredible diversity of habitats that provide food and shelter for more than 440 bird species throughout the year, making the state a destination for birders and nature lovers. The North Carolina Birding Trail

is a driving trail linking birders and tourists with great birding sites across the state and the local communities in which they are found. The second of three regional guides, the Piedmont Trail Guide presents 103 premier birding destinations in the North Carolina piedmont, most within an easy drive of the state's urban centers, between Charlotte on the west and Interstate 95 on the east. The spiral-bound volume features maps, detailed site descriptions, and color photographs throughout. Each site description includes directions as well as information on access, focal species and habitats, and on-site visitor amenities. Special "while you're in the area" listings accompany each of fourteen site groupings, so visitors can travel to a

cluster of birding destinations and enjoy other local highlights and attractions along the way. The North Carolina Birding Trail Milestone PressInc With its prominent profile recognizable for miles around and featuring vistas among the most beloved in the Appalachians, North Carolina's Grandfather Mountain is many things to many people: an easily recognized landmark along the Blue Ridge Parkway, a popular tourist destination, a site of annual Highland Games, and an internationally recognized nature preserve. In this definitive book on Grandfather, Randy Johnson guides readers on a journey through the mountain's history, from its geological beginnings

millennia ago and the early days of exploration to its role in regional development and eventual establishment as a North Carolina state park. Along the way, he shows how Grandfather has changed, and has been changed by, the people of western North Carolina and beyond. To tell the full natural and human story, Johnson draws not only on historical sources but on his rich personal experience working closely on the mountain alongside Hugh Morton and others. The result is a unique and personal telling of Grandfather's lasting significance. The book includes more than 200 historical and contemporary photographs, maps, and a practical guide to hiking the extensive trails, appreciating key plant and animal species and photographing the natural wonder that is Grandfather.

New parents and parents of toddlers face unique challenges when it comes to planning outdoor trips. "Family-friendly trail" is often a misleading phrase, and doesn't take young children under the age of 5 into consideration, whose safety and comfort require a different perspective. The unpredictable nature of little ones leads many parents to put their adventure dreams on the back burner, missing out on years of meaningful experiences as a family. *Hike it Baby* presents 100 outdoor adventures across the U.S. that you can take with babies and toddlers (really!), along with everything you need to know about exploring the natural world. Sourced from real families using *Hike it Baby's* trail-tested system, this book helps moms and dads get out there in their comfort zone, yet feel like hardcore adventurers! Whether you've always wanted to hike part of the Appalachian Trail, splash around in gentle Northwest waterfalls, or scramble up

rocks in the desert surrounded by Joshua Trees, this book shows you how to plan a truly memorable journey together.

A New York Times Bestseller!
Based on the wildly popular Instagram account, Subpar Parks features both the greatest hits and brand-new content, all celebrating the incredible

beauty and variety of America's national parks juxtaposed with the clueless and hilarious one-star reviews posted by visitors. Subpar Parks, both on the popular Instagram page and in this humorous, informative, and collectible book, combines two things that seem like they might not work together yet somehow harmonize perfectly: beautiful illustrations and informative, amusing text celebrating each national park paired with the one-star reviews disappointed tourists have left online. Millions of visitors each year enjoy Glacier National Park, but for one visitor, it was simply "Too cold for me!" Another saw the mind-boggling vistas of Bryce Canyon as "Too spiky!" Never mind the person who visited the thermal pools at Yellowstone National Park and left thinking, "Save yourself some money, boil some water at home." Featuring more than 50 percent new material, the book will include more depth and insight into the most popular parks, such as Yosemite, Yellowstone, the Grand Canyon, and Acadia National Parks; anecdotes and tips from rangers; and much more about author Amber Share's personal love and connection to the outdoors. Equal parts humor and love for the national parks and the great outdoors, it's the perfect gift for anyone who loves to spend time outside as well as have a good read (and laugh) once they come indoors.

Exploring South Carolina State Parks Moon Travel
In 1975-1976, pine trees killed by the southern pine beetle (*Dendroctonus frontalis* Zimm.) in a 2170-hectare (5362-acre) area at the William B. Umstead State Park in central North Carolina, were monitored by sequential color infrared aerial photography. From 1973 through summer 1975, beetles in 350 infestation spots killed more than 20,500 pines on 137 hectares (339 acres). From October 1975 to July 1976, an additional 301 dead pines were detected at 146 tree mortality centers. Southern pine beetles were associated with 98 percent of these dead trees. Pine mortality dropped rapidly from 248 trees killed in fall and winter at 120 spots to 9 trees killed in July at six spots. The volume of timber killed during the outbreak exceeded 16,000 m³ (7500 cords) of roundwood valued at more than \$240,000. Strictly speaking, this is not an economic loss because the Park's management goal is to maintain a "natural forest."

In the literature dealing with the Civilian Conservation Corps, South Carolina does not figure prominently in most histories of the Great Depression story. That neglect should be

corrected! It is important to recognize the ways in which racism has permeated our society, sometimes blatant and sometimes subtle. While the focus is South Carolina, the particulars are representative of what happened in CCC camps across the nation. As one of the most popular facets of President Franklin D. Roosevelt's New Deal, the activities and antics of the CCC boys deserve attention. My primary purpose in writing this book is to assist teachers and librarians and their upper level elementary and high school students in understanding this crucial but understudied era in South Carolina's history. These readers and a more general South Carolina audience could identify with a nearby place or make a family connection.

DuPont Forest protects thousands of acres of trees, five lakes and more than one hundred miles of multiuse trails. It attracts hikers, equestrians and mountain bikers from all over the United States, and its six waterfalls have been featured in movies like *The Hunger Games* and *The Last of the Mohicans*. All of this natural beauty is easily accessible, increasing its appeal. It took not only the generosity of a multinational company but also Southern Appalachian grit and self-reliance and local activism to make these benefits available to

all. DuPont Forest is young, and its future is still unfolding. Author and hiker Danny Bernstein traces the past of DuPont State Recreational Forest and shows its potential. Hiking North Carolina's Blue Ridge Mountains Menasha Ridge Press

“The children and nature movement is fueled by this fundamental idea: the child in nature is an endangered species, and the health of children and the health of the Earth are inseparable.” —Richard Louv, from the new edition
In his landmark work *Last Child in the Woods*, Richard Louv brought together cutting-edge studies that pointed to direct exposure to nature as essential for a child's healthy physical and emotional development. Now this new edition updates the growing body of evidence linking the lack of nature in children's lives and the rise in obesity, attention disorders, and depression. Louv's message has galvanized an international back-to-nature campaign to “Leave No Child Inside.” His book will change the way you think about our future and the future of our children. “[The] national movement to ‘leave no child inside’ . . . has been the focus of Capitol Hill hearings, state legislative action, grass-roots projects, a U.S. Forest Service initiative to get more children into the woods and a national effort to promote a ‘green hour’ in each

day. . . . The increased activism has been partly inspired by a best-selling book, *Last Child in the Woods*, and its author, Richard Louv.” —The Washington Post “*Last Child in the Woods*, which describes a generation so plugged into electronic diversions that it has lost its connection to the natural world, is helping drive a movement quickly flourishing across the nation.” —The Nation’s Health “This book is an absolute must-read for parents.” —The Boston Globe Now includes *A Field Guide with 100 Practical Actions We Can Take* Discussion Points for Book Groups, Classrooms, and Communities Additional Notes by the Author New and Updated Research from the U.S. and Abroad

This colorful guidebook offers a complete recreation guide to the opportunities available in South Carolina's parks for visitors and travelers, families, campers, hikers, nature lovers, history buffs, and outdoor enthusiasts. Best-selling authors J.L. and Lin Stepp so enjoyed visiting all the state parks in their home state of Tennessee, while writing their award-

winning book *Discovering Tennessee State Parks*, that they decided to spread their wings and visit all the parks in South Carolina, too. The result is *Exploring South Carolina State Parks*, a guidebook providing detailed descriptions of each of the forty-seven state parks, along with descriptions of eight of South Carolina's national parks and historic sites. In a format similar to their Tennessee parks guide and their best-selling Smoky Mountain hiking guide, *The Afternoon Hiker*, the Stepps provide clear directions to get to every park, suggestions for interesting things to do and see while visiting or camping, tips and local insights about the area, and over 700 color illustrations to showcase the beauty of every park visited. The book is divided into four South Carolina regions, the Lowcountry, Midlands, Pee Dee, and Upstate. Each regional section has its own index and at the end of the book is a colorful map and an alphabetical index to help readers easily locate any park of interest. Based on the authors' own explorations and travels throughout South Carolina, this guide offers a detailed personal account of the diverse and picturesque parks, all rich with history

and beauty. So pack your bags and get ready for some fun looking through this guide and planning your upcoming trip to The Palmetto State. "This is more than a publication of South Carolina state parks. It is the perfect guide for exploring what the parks have to offer in detail. For visitors and campers, the listing of the amenities, photos, and directions is a most valuable tool. As an avid camper, the Stepp's previous guidebook, *Discovering Tennessee State Parks*, helped me to find new hidden gems in my state. With this new guide, I'm looking forward to visiting as many South Carolina parks as I can!" - Gloria Motter, Cades Cove Museum Director, historian and public speaker
