Is Killing People Right? Cambridge University Press
When Rick Lifer enters college in 1986 at the age of 24, he expects only to receive an education and hopes to finally leave his violent past behind. His plan is thrown a curve when he meets Karla Sanders and she recruits him for a position in the university's student government. He doesn't fit in with the Greek-centric organization, but he falls for her and that give him enough reason to continue. Then the murders begin. Rick gets involved when he learns that the victims all have a connection to Karla and the deaths affect her greatly. Being a natural protector, he begins to unravel the secrets behind the series of campus murders.

Leah Bennett sits in an open convertible in a drugstore parking lot and has no idea that a routine trip to buy cigarettes will threaten her

life and end her marriage. Paralyzed in fear, she watches as two masked men, dressed entirely in black and brandishing weapons, follow her husband Dan into the drugstore. Moments later after four shots ring out, she is torn between staying in the car with her young daughter Hannah and giving aid to the victims of the crime, especially her husband. Either by fate or divine design, Michael Nagle, a Marine sniper on special assignment, drives into the parking lot with his military dog and inserts himself into the fray. Leah finds herself being stalked by the killer who intends to kill her and kidnap Hannah. A psychological thriller where good men do everything necessary to defeat evil.

Defensive Killing Lexington Books
This magisterial work is the first comprehensive study of the ethics of killing, where the moral status of the individual killed is uncertain. Drawing on philosophical notions of personal identity and the immorality of killing, McMahan looks carefully at a host of practical issues, including abortion, infanticide, the killing of

animals, assisted suicide, and euthanasia.

Most people believe that it is sometimes morally permissible for a person to use force to defend herself or others against harm. In *Defensive Killing*, Helen Frowe offers a detailed exploration of when and why the use of such force is permissible. She begins by considering the use of force between individuals, investigating both the circumstances under which an attacker forfeits her right not to be harmed, and the distinct question of when it is all-things-considered permissible to use force against an attacker. Frowe then extends this enquiry to war, defending the view that we should judge the ethics of killing in war by the moral rules that govern killing between individuals. She argues that this requires us to significantly revise our understanding of the moral status of non-combatants in war. Non-combatants who intentionally contribute to an unjust war forfeit their rights not to be harmed, such that they are morally liable to attack by combatants fighting a just war.

Human Killing Machines offers a comparative analysis of the indoctrination methods used to produce violence in the famous Milgram and Zimbardo psychological experiments, as well as Iran, Nazi Germany, Al Qaeda, and Abu Ghraib. Based on these findings, specific policy recommendations are made for how we can begin to reform the U.S. military and increase its accountability, shake Al Qaeda terrorists' commitment to their missions, and reverse course on Iran to bring the oppressive regime down from the inside.

The People Vs Tech Independently Published

A devious tale of psychological suspense perfect for fans of Paula Hawkins' *The Girl on the Train*—and is soon to be a major movie directed by Agnieszka Holland. In a tantalizing set-up reminiscent of Patricia Highsmith's classic *Strangers on a Train*... On a night flight from London to Boston, Ted Severson meets

the stunning and mysterious Lily Kintner.

Sharing one too many martinis, the strangers begin to play a game of truth, revealing very intimate details about themselves. Ted talks about his marriage that's going stale and his wife Miranda, who he's sure is cheating on him. Ted and his wife were a mismatch from the start—he the rich businessman, she the artistic free spirit—a contrast that once inflamed their passion, but has now become a cliché. But their game turns a little darker when Ted jokes that he could kill Miranda for what she's done. Lily, without missing a beat, says calmly, "I'd like to help." After all, some people are the kind worth killing, like a lying, stinking, cheating spouse. . . . Back in Boston, Ted and Lily's twisted bond grows stronger as they begin to plot Miranda's demise. But there are a few things about Lily's past that she hasn't shared with Ted, namely her experience in the art and craft of murder, a journey that began in her very precocious youth. Suddenly these co-conspirators are embroiled in a chilling game of cat-and-mouse, one they both cannot survive . . . with a shrewd and very determined detective on their tail.

The Basics of Bioethics, Fourth Edition offers an easy-to-follow introduction to this dynamic field, intended for healthcare professionals, teachers, students, and anyone interested in bioethics. Accessible and enjoyable for readers of all backgrounds, the book contains numerous cases—including ones that recently have dominated international headlines—to help anchor the broader discussion. The text is suitable for use in short courses in schools of medicine, nursing, and other health professions; continuing professional education; various undergraduate departments; and adult education. Chapters are organized around common moral themes in order to help readers understand the values and other connections that tie together different positions in bioethics. This fourth edition adds a new chapter on alternative frameworks in bioethics, including narrative ethics and casuistry, feminist approaches, care ethics, and virtue ethics. Due to significant

advances in genetics and reproductive possibilities, this new edition devotes a full chapter to each. The combined teaching, research, and clinical experience of the two authors helps make this edition current with the evolving field of bioethics, while still embedding the major issues in a systematic framework that allows readers easily to navigate the larger field. Key Changes to the Fourth Edition:

- An added chapter on new and emerging approaches in bioethics, including those based on virtue ethics, casuistry and narrative ethics, feminist ethics, and care ethics
- Updates throughout the book based on developments in ethical theory and new medical research
- Revisions and updates to the Learning Objectives, Key Terms, Bibliographies, and URLs
- The addition of multiple recent case studies, including: Jahi McMath an undocumented patient who needs a rule bent a pediatrician who turns away unvaccinated patients a minor eligible for pediatric bariatric surgery a daughter suing a hospital for non-disclosure of her father ' s Huntington ' s diagnosis CRISPR-edited newborn babies

Killing a person is in general among the most seriously wrongful forms of action, yet most of us accept that it can be permissible to kill people on a large scale in war. Does morality become more permissive in a state of war? Jeff McMahan argues that conditions in war make no difference to what morality permits and the justifications for killing people are the same in war as they are in other contexts, such as individual self-defence. This view is radically at odds with the traditional theory of the just war and has implications that challenge common sense views. McMahan argues, for example, that it is wrong to fight in a war that is unjust because it lacks a just cause. Killing for God Open Road Media 'Great cases' are those judicial decisions around which the common law pivots. In a sequel to the instant classic *Is Eating People Wrong?*, this book presents eight new great cases from the

United Kingdom, the United States and Australia. Written in a highly accessible yet rigorous style, it explores the social circumstances, institutions (lawyers, judges and courts) and ordinary people whose stories shaped the law. Across the courts' diverse and uncoordinated attempts to adapt to changing conditions and shifting demands, it shows the law as the living, breathing and down-the-street experience it really is. Including seminal cases in end of life, abortion and equal rights, this is an ideal introduction for students to legal history and jurisprudence.

On Killing Melbourne Univ. Publishing Journey with Ollie Marie Phason, the mother of Broderick Bell, the six-year-old who was shot between the eyes with a 9 mm and went back to school in second grade just two months later. A family with a godless lifestyle of murder, drive-by shootings, molestation, drugs, and alcohol addiction. This is the family's journey to find God and the "power of prayer."

Therefore, since we have a great high priest who has ascended into heaven, Jesus the Son of God, let us hold firmly to the faith we profess. For we do not have a high priest who is unable to empathize with our weaknesses, but we have one who has been tempted in every way, just as we are""yet he did not sin. Let us then approach God's throne of grace with confidence, so that we may receive mercy and find grace to help us in our time of need. (Heb. 4:14""16, NKJV) Denver's 1993 "summer of violence" left seventy-four dead. Even though the number of homicides was lower that year than in encompassing years, the outcome was different. People were more frightened. Much of the violence was gang related, and the violence had moved beyond the boundaries of the inner city. The killing and injuring of innocent people had spread to

the suburbs. Some of the deaths were from stray bullets; others intentional murder. There was also a randomness to the violence, which increased the fear. Gang members were killing people who were not gang-involved, giving the feeling anyone could be the next victim. Fear spiked, and there was a run on guns at stores. Many of the gang-related murders that summer were drive-by shootings, and nearly half of the murder victims were teenagers. Then-Gov. Roy Romer said of the violence: "It's not just the number of acts . . . It's the increased awareness that these are very young people who have no code of conduct, no moral framework that teaches them to respect life." He called a special session of the legislature, and ten special-session bills on youth violence were signed into law that September. They included the ban of handgun possession by youths under eighteen, the construction of more jail space, and the right to charge fourteen- through seventeen-year-olds as adults for violent crimes. When the Enemy comes in like a flood, the Spirit of God will raise a standard against him! (Isa. 59:19, NKJV)

From the bestselling author of *The Dark Net* comes a book that explains all the dangers of the digital revolution and offers concrete solutions on how we can protect our personal privacy, and democracy itself. The internet was meant to set us free. But have we unwittingly handed too much away to shadowy powers behind a wall of code, all manipulated by a handful of Silicon Valley utopians, ad men, and venture capitalists? And, in light of recent data breach scandals around companies like Facebook and Cambridge Analytica, what does that mean for democracy, our delicately balanced system of government that was created long before big data, total information, and artificial intelligence? In this urgent polemic, Jamie Bartlett argues that through our unquestioning embrace of big tech, the building blocks of

democracy are slowly being removed. The middle class is being eroded, sovereign authority and civil society is weakened, and we citizens are losing our critical faculties, maybe even our free will. The *People Vs Tech* is an enthralling account of how our fragile political system is being threatened by the digital revolution. Bartlett explains that by upholding six key pillars of democracy, we can save it before it is too late. We need to become active citizens, uphold a shared democratic culture, protect free elections, promote equality, safeguard competitive and civic freedoms, and trust in a sovereign authority. This essential book shows that the stakes couldn't be higher and that, unless we radically alter our course, democracy will join feudalism, supreme monarchies and communism as just another political experiment that quietly disappeared.

If you are afraid of dying and do not want to know the truth, this may not be the book for you. If on the other hand you want a true insider's look at healthcare and the ways people suffer and are killed at the hands of others, then read on. Hospice has a lollipop and candy cane image, that could not be further from the truth. It is a hard core business of 'dealing' with the most susceptible in our society, the dying. Hospice would like us to believe that they are here to provide our loved ones with the care and attention they need in their final months, weeks and days. And although that may have been the noble start of this service, they have become like any modern business of putting profits first. They make money from you dying and when that is no longer profitable, they neatly dispose of you through various means. And when employees speak up, they are disposed of as well. You will read first-hand accounts of patients that have fallen into healthcare traps. The treatments, that the patients were provided, not for their benefit, but to enrich a company, will shock you. Their misfortune can help you, or a loved one, avoid the same fate. But, you need to know what questions to ask, what your rights are, and what

the healthcare provider is required to do. You need to have your eyes fully open. It may all sound like cloak and dagger, but with hospice it happens out in the open and right in front of you. They really do have a license to kill. Will you or your loved one be their next victim? Western Teacher Christian Faith Publishing, Inc.

"Getting the job done" for one single mom takes on a whole new meaning in Finlay Donovan is Killing It. One of Suspense Magazine's "Best Thrillers of 2021" One of New York Public Library's Best Books of 2021 Nominated for the Left Coast Crime 2022 Lefty Award for the Best Humorous Mystery " Funny and smart, twisty and surprising. " —Megan Miranda Finlay Donovan is killing it . . . except, she ' s really not. She ' s a stressed-out single-mom of two and struggling novelist, Finlay ' s life is in chaos: the new book she promised her literary agent isn ' t written, her ex-husband fired the nanny without telling her, and this morning she had to send her four-year-old to school with hair duct-taped to her head after an incident with scissors. When Finlay is overheard discussing the plot of her new suspense novel with her agent over lunch, she ' s mistaken for a contract killer, and inadvertently accepts an offer to dispose of a problem husband in order to make ends meet . . . Soon, Finlay discovers that crime in real life is a lot more difficult than its fictional counterpart, as she becomes tangled in a real-life murder investigation. Fast-paced, deliciously witty, and wholeheartedly authentic in depicting the frustrations and triumphs of motherhood in all its messiness, hilarity, and heartfelt moment, Finlay Donovan Is Killing It is the first in a brilliant new series from YA Edgar Award nominee Elle Cosimano. Killing the Hunt Rowman & Littlefield Death has long been a pre-occupation of philosophers, and this is especially so today. The Oxford Handbook of Philosophy of Death collects 21 newly commissioned

essays that cover current philosophical thinking of death-related topics across the entire range of the discipline. These include metaphysical topics--such as the nature of death, the possibility of an afterlife, the nature of persons, and how our thinking about time affects what we think about death--as well as axiological topics, such as whether death is bad for its victim, what makes it bad to die, what attitude it is fitting to take towards death, the possibility of posthumous harm, and the desirability of immortality. The contributors also explore the views of ancient philosophers such as Aristotle, Plato and Epicurus on topics related to the philosophy of death, and questions in normative ethics, such as what makes killing wrong when it is wrong, and whether it is wrong to kill fetuses, non-human animals, combatants in war, and convicted murderers. With chapters written by a wide range of experts in metaphysics, ethics, and conceptual analysis, and designed to give the reader a comprehensive view of recent developments in the philosophical study of death, this Handbook will appeal to a broad audience in philosophy, particularly in ethics and metaphysics.

In Justified Killing, Whitley R. P. Kaufman argues that none of the leading theories adequately explains why it is permissible even to kill an innocent attacker in self-defense, given the basic moral prohibition against killing the innocent. Kaufman suggests that such an explanation can be found in the traditional Doctrine of Double Effect, according to which self-defense is justified because the intention of the defender is to protect himself rather than harm the attacker.

How hard is it to kill, as a hunter on a Kangaroo cull, as a worker in an abattoir, as an executioner in a prison, as a soldier at war? Ninety years after World War I, police in a Victorian country town uncover the mummified head of a Turkish soldier, a bullet-ridden souvenir brought home from Gallipoli by a returning ANZAC. The macabre discovery sets Jeff Sparrow on a quest to understand the nature of deadly violence. How do ordinary people—whether in today's wars or in 1915—learn to take a human life? How do they live with the aftermath? These questions lead Sparrow through history and across Australia and the USA, talking to veterans and slaughtermen, executioners and writers about one of the last remaining taboos. Compassionate, engaged and political, *Killing* takes us up close to the ways society kills today, meditating on what violence means, not just for perpetrators, but for all of us.

'Charlie had become instrumental in ruining his life, including the stripping away of his fondest memories, which in turn had been so life-sustaining to him. Now he had either to face suicide because nothing was left or defend himself against the apparent involvement of Charlie by killing him...He would kill Charlie or die trying.' On a forest farm in Vermont lives John Deere, whose wife, the nurturer of the farm, has died, leaving him depressed and unsure of what to do. Faced with the possibility of losing his farm, he becomes obsessed with killing that which has claimed its dominance over the farm, an abnormally large, one-eyed buck he has named Charlie. As Charlie becomes John's adversary, John begins walking the fine line between sanity and insanity while struggling with his quickly deteriorating health and coming to grips with the reality of his life. But not even his newfound interest in Maggie, a nurse, can distract him from his final mission: "eliminating Charlie. For John, it is survival, nothing more than the law of nature or so it seems. A fascinating journey into the disturbed mind of a man falling apart, *Killing the Hunt* is a captivating legend soon to be

the obsession of every reader."

Great cases are those judicial decisions around which the common law develops. This book explores eight exemplary cases from the United Kingdom, the United States and Australia that show the law as a living, breathing and down-the-street experience. It explores the social circumstances in which the cases arose and the ordinary people whose stories influenced and shaped the law as well as the characters and institutions (lawyers, judges and courts) that did much of the heavy lifting. By examining the consequences and fallout of these decisions, the book depicts the common law as an experimental, dynamic, messy, productive, tantalizing and bottom-up process, thereby revealing the diverse and uncoordinated attempts by the courts to adapt the law to changing conditions and shifting demands. Great cases are one way to glimpse the workings of the common law as an untidy but stimulating exercise in human judgment and social accomplishment.

The Ethics of Killing Minotaur Books

This book represents a unified, interdisciplinary inquiry into several of the major empirical and normative issues raised by the death penalty. The essays have been revised and updated to survey the current state of the death penalty against the background of the past half-century, and are divided along two major axes: one detailing a range of facts raised by the controversy over capital punishment, the other presenting a critical evaluation of the subject from a constitutional and ethical point of view. The author addresses topics that include strong public support for the death penalty, wrongful convictions in capital cases, the disappearance of executive clemency, constitutional arguments surrounding the Eighth Amendment, and procedural reforms presently under consideration that move toward abolition.
