An Introduction to Christian Theology McGraw-Hill Education (UK)

Society for Educational Studies Annual Book Prize winner: 2nd Prize This ground-breaking volume draws upon a rich and variegated range of methodologies to understand more fully the practices, policies and resources available in and to religious education in British schools. The descriptions, explanations and analyses undertaken here draw on an innovative combination of policy work, ethnography, Delphi methods, Actor Network Theory, questionnaires, textual analysis as well as theological and philosophical insight. It traces the evolution of religious education in a post-religious age from the creation of policy to the everyday experiences of teachers and students in the classroom. It begins by analysing the way in which policy has evolved since the 1970s with an examination of the social forces that have shaped curriculum development. It goes on to explore the impact and intentions of a diverse group of stakeholders with sometimes competing accounts of the purposes of religious educations. It then examines the manner in which policy is, or is not, enacted in the classroom. Finally, it explores contradictions and confusions, successes and failures, and the ways in which wider public debates enter the classroom. The book also exposes the challenge religious education teachers have in using the language of religion.

An Introduction to Pentecostalism Cambridge University Press

This book analyses the development of different meanings of the term 'religion' in different contexts and in relation to other categories with shifting and unstable nuances such as the state, politics, economics, and the secular. It traces a major transformation of the category as a function of Euro-American colonialism and capitalism from its traditional meaning of Christian Truth to the modern generic and pluralised category of religions and world religions. Throughout the period under consideration discourses on religion have overlapped significantly with discourses on 'our' civility as opposed to 'their' barbarity, underpinning the superior rationality of the literate male elite of western societies.

Discourse on Civility and Barbarity Hodder Education

This book is a comprehensive survey of the history and, more particularly, of the thought of Antioch from the second to the eighth centuries of the Christian era. Dr Wallace-Hadrill traces the religious background of Antiochene Christianity and examines in detail aspects of its intellectual life: the exegesis of scripture, the interpretation of history, philosophy, and the doctrine of the nature of God as applied to an understanding of Christ and man's salvation. The community at Antioch stressed history and literalism, in self-conscious opposition to the tendency to allegorise that prevailed at Alexandria. While insisting on the divinity of Christ, they were equally adamant that no other doctrine should be allowed to compromise their central belief that Jesus was really human.

More Than Belief A&C Black

John Wyclif is known for translating the Vulgate Bible into English, and for arguing for the royal divestment of the church, the reduction of papal power and the elimination of the friars and against the doctrine of transubstantiation. His thought catalyzed the Lollard movement in England and provided an ideology for the Hussite revolution in Bohemia. Wyclif's Trialogus discusses divine power and knowledge, creation, virtues and vices, the Incarnation, redemption and the sacraments. It consists of a three-way conversation, which Wyclif wrote to familiarize priests and layfolk with the complex issues underlying Christian doctrine, and begins with formal philosophical theology, which moves into moral theology, concluding with a searing critique of the fourteenth-century ecclesiastical status quo. Stephen Lahey provides a complete English translation of all four books, and the 'Supplement to the Trialogue', which will be a valuable resource for scholars and students currently relying on selective translated extracts.

Religious Education in the Secondary School Cambridge University Press

This book provides a reasoned, comprehensive understanding of what religion is as well as a clear and critical assessment of whether, in the light of modern developments in philosophy, contemporary thinking people can responsibly maintain religious belief in God. The book is divided into three major sections: the first deals with what all religions may be said to have in common; the second discusses theistic religion and the issue of intellectually responsible belief in God; the third examines current developments within a particular theistic religion, Christianity. Originally published in 1968, the book is basic, both in the nature of the issues it discusses and in the clarity and comprehensiveness of its presentation; it is varied in the arguments and perspectives dealt with; it provides an introduction to philosophical thinking through the problems of philosophy of religion; and it deals seriously with controversial movements in theology.

God, Sexuality, and the Self Cambridge University Press

How do we reconcile the existence of evil in the world with the goodness of an omnipotent God, and how does God's omnipotence relate to people's responsibility for their own salvation or damnation? Sociologist Leszek Kolakowski reflects on a centuries-long debate in Christianity. "Several books a year wrestle with that hoary conundrum, but few so dazzlingly as the Polish philosopher's latest".--Carlin Romano, WASHINGTON POST BOOK WORLD.

Outlines of Jainism Bloomsbury Publishing

This book challenges the traditional idea that religions can be understood primarily as texts to be interpreted, decoded, or translated. In *More Than Belief*, Manuel A. Vázquez argues for a new way of studying religions, one that sees them as dynamic material and historical expressions of the practices of embodied individuals who are embedded in social fields and ecological networks. He sketches the outlines of this approach through a focus on body, practices, and space. In order to highlight the centrality of these dimensions of religious experience and performance, Vázquez recovers materialist currents within religious studies that have been consistently ignored or denigrated. Drawing on state-of-the-art work in fields as diverse as anthropology, sociology, philosophy, critical theory, environmental studies, cognitive psychology, and the neurosciences, Vázquez offers a groundbreaking new way of looking at religion.
